

## An Experience

**Touring the mine is truly a memorable experience.**

**The Happy Jack Chalk Mine is not only Nebraska's biggest, underground adventure, it is Nebraska's only underground adventure!**

**Your underground experience awaits!**

## Our Mission

**Our Mission is to develop the Happy Jack Peak and Chalk Mine site into an educational, historical, recreational and scenic area for local residents and tourism in the distinctive North Loup River Valley area.**

**Through this mission, the Happy Jack Chalk Mine Associations extends itself to identifying education, historic, economic, environmental, social and recreational concerns and opportunities for developing and implementing strategies to better the quality of life for residents and those who visit the Central Nebraska area.**

# Happy Jack Peak and Chalk Mine

## Take a look Back

*Imagine that you are trekking across Central Nebraska in the Miocene Epoch, about 6-10 million years ago. There are no highways, no towns, no people... just seemingly endless grassland crossed by pristine rivers and dotted with small patches of woodland. The climate is pleasant and hardly ever cold. Elephants, rhinos, camels, horses, and tapirs still roam the area, and there might be a saber-toothed catlike predator lurking nearby. Near future Scotia, Nebraska, you are surprised to see a large lake—a very inviting place for animals of all kinds. That lake is depositing layers of sediment consisting of billions of tiny, algae-like organisms called diatoms. They grow abundantly as the ancient sunlight filters down through the cool, clear waters.*

**The Happy Jack Chalk Mine is one of the most unusual and interesting sites of geological interest on the Great Plains.** The “chalk” is not chalk at all, but rather a soft rock called diatomite that contains abundant calcium carbonate,
